

User Intelligence

Reporting from NAV for everyone through the power of Excel

Imagine having complete visibility into every area of your business at the tip of your fingers. Company consolidations, daily cash positions, financials and sales – whenever you need them, formatted to get your point across. With Jet Reports, your imagination becomes reality.

Jet Reports is the complete reporting tool that sits inside Excel and allows every single user to create reports using data from any granule in Dynamics NAV, including advanced dimensions and customisations.

Any report. Any way. Right Now.™

Introducing Jet Reports

Jet Reports is different – it's all inside Excel.

Using this program you know and love, you can create fantastic reports linked using our Dynamics NAV add-on.

This is personal reporting for individual users – you choose the experience you want.

Jet Reports allows you to work in Excel and refresh your information, while Dynamics NAV maintains your data safely on the server.

It is the reporting system for the ordinary user – all you need is Microsoft Office, a basic knowledge of Excel and you can strike a blow for independence, producing your own reports – any report, any way, right now!

Why do you need Jet Reports?

You have an excellent accounting system that stores all of the data you need about your customers, vendors, inventory, products, sales and financial position.

But how much time do you spend transferring that data into spreadsheets so you can analyse and report on it?

Imagine getting all the information you want, exactly when you want it and in the format you want it.

Financials, cash position, inventory, sales, customer reports, budgets, even project information is at your fingertips – all via Excel.

Jet Reports offers real visibility into the workings of your business.

Painless

As a Jet Reports Designer, you are just steps away from a completed report with the Jet Wizard.

You can drag and drop information right into Excel from your system.

Formatting is no problem with Jet Reports – it's all just Excel.

Jet even allows you to automatically refresh and email your reports with its convenient Scheduler.

Reports

Jet Reports gives new visibility into your business by integrating your NAV information with Excel.

It's all inside Excel, so you can do it yourself – no waiting.

Create it, modify it, format it, add a calculation, schedule it, email it – you're in control.

Flexible

Do you have a question about that summary number? The drilldown features in Jet will open a session in Dynamics NAV to reveal the source data behind it.

Automatically send reports by email with a summary of the key data shown in the email subject or body.

Connect to any application

With Jet Reports you can connect to any of your other applications (SQL, OLE or ODBC compliant database). You can even connect to multiple applications in one report.

Fast Track Training

Jet Reports Fast Track training, for those who need it, is a service designed for new users to enhance your Jet Reports purchase and to provide you with the tools you need to successfully utilise Jet Reports right away.

UserIntelligence

The Power of Jet Reports

Jet Reports sits inside Excel as a ribbon option.

The Jet Ribbon makes it easy to find what you need. It feels like you're just using standard Excel, but with all the power of Dynamics NAV available to you.

The Jet Reports Ribbon offers a range of really helpful features.

Jet Wizard

Creating reports couldn't be easier.

With the Jet Wizard you're just a few simple steps away from a completed report.

Jet Scheduler

No more messing about each month when reports have to be sent out to all and sundry.

The Jet Scheduler allows you to automatically refresh and distribute reports by email to your designated recipients.

Jet Designer

The Jet Designer provides visibility into your business.

See all of your information then use the Drag and Drop feature to design your report.

Drag and Drop

Drag and drop allows you to build reports by simply clicking on the desired fields in the Jet Designer window and dragging them right into Excel. It's that simple.

Drilldown

With Jet Reports drilldown, you are only one click away from your data.

Click the drilldown button and Jet will open Dynamics NAV and show you the source data behind it.

Dynamics NAV permissions are respected seamlessly, requiring no additional set-up.

Jfx

With Jfx, you can insert report functions with ease.

Jfx allows you to create formulas, step by step, using your own data.

Universal Connector

Jet Reports can connect to all of your applications with its in-built universal connector functionality.

Online Help

Jet Reports provides comprehensive online help.

Simply press F1 for tutorials and references.

The Benefits of Jet Reports

Fast Implementation

Customers are usually live in less than a day – nothing is faster and simpler than Jet Reports.

No need to build complex cubes and databases, the data is sitting right there in your Dynamics NAV application.

Easy to Use

Part of the fast implementation is the rapid acceptance by users who see Jet Reports as simply another part of Excel.

So end users require very little training and are able to start producing reports instantly.

Powerful

Jet Reports is fast – downloading data is quick and, once in Excel, the only restriction is your own PC's response time.

Flexible

Jet Reports lets you access data from anywhere.

Take data out of your NAV system – or any other you might be using – and combine it all together to produce consolidated reports.

Low Cost

Jet Reports is priced attractively and takes just one day to install and to deliver the necessary basic education for users.

Jet Reports is the most cost-effective reporting solution available for Dynamics NAV users today.

Our fast installation and short learning curve means you get a lower cost implementation, resulting in a rapid return on investment.
