

MetaManWorks

The Dynamics NAV solution for engineering companies

MetaMan, designed specifically for the UK SME market, is built around the power of Microsoft's Dynamics NAV package. It has the strategy, planning and deployment functionality that manufacturers need to help streamline their operations and to respond quickly to changing market conditions.

MetaMan provides a quick, responsive and adaptable way to plan manufacturing, assess capacity available, offer projections of delivery date, put plans into action, track, progress, cost and analyse performance of all aspects of the manufacturing process.

Introducing MetaMan

To succeed in today's challenging market, engineering companies need to optimise the whole process to get maximum efficiency.

This means that you need a system that controls every aspect of the cycle, shortening manufacturing times and eliminating excess cost.

MetaMan offers a modern, easy to use, cost-effective solution that delivers a real return on investment.

- Discrete or batch process
- Make to stock or make to order
- Contract or project-based manufacturing

Our solution provides a robust set of tools to manage and analyse every aspect of your business.

Totally Flexible

The parameter-driven software base provided by Microsoft's Dynamics NAV means that MetaMan can be configured to match the processes of a wide range of industry sectors.

With workflow, MetaMan can adapt to your business, allowing you to operate in the way your users do now – making the solution easy to accept and quick to install, delivering a rapid return on your investment.

The graphical reporting tools in MetaMan cover every area of your operation. They allow you to get key information, where and when you want it.

The enquiries and reports that MetaMan produces can be emailed, posted on the web or accessed via a browser.

Fast, easy to use and very powerful – MetaMan's reporting tools make controlling your business operations easier and improves your ability to make key decision.

In addition, the solution's integration with MS Office means that the user interface looks and works like a familiar desktop.

This also helps to speed up user acceptance, reducing the time and cost involved.

Finally, with the powerful web services enablement, the system can be opened up to customers, suppliers and users in the field through a simple set of interfaces.

Key Functionality

MetaMan offers a range of granules that can be combined to suit your own specific manufacturing environment.

- Production Management
- Bills of Material (BOM)
- Graphical Scheduling
- Advanced Finite Scheduling
- Order Promising
- Exceptions Handling
- Supply Planning
- Demand Forecasting
- Manual Planning
- Inventory Optimisation
- Capacity Planning
- Warehousing & Inventory
- MRP
- Manufacturing Costing
- Automated Data Collection
- Integration
- Traceability
- Subcontract Processing
- Configurator
- CRM
- Service Management

MetaManWorks

Benefits

Boost operational efficiency

With MetaMan, you can respond quickly to last-minute requests for changes and take advantage of new opportunities to help your business stay ahead of the competition.

Simplify your processes

Streamline your processes by offering users rapid visibility of work-in-progress (WIP), support for order-by-order workflow and the ability to implement additional functionality as business needs become more complex.

Improve business performance

Streamline your operations by automating manufacturing processes and gain greater visibility into all aspects of your operations from order entry to production, from warehouse management to delivery.

Information you can count on

MetaMan provides customers, suppliers and your own staff with more accurate information that allows them to make better decisions.

- Offer better customer service by providing highly accurate promises on delivery.
- Let suppliers see key information they need to help meet your deadlines.
- Give your users confidence in the system by delivering accurate information that is available instantly, anywhere they may be working and in any format needed.

About Metaphorix

Metaphorix helps small and medium-sized companies change the way they do business with their customers and with their suppliers.

The company has a strong customer portfolio in our chosen vertical markets across the SME and Corporate sectors. As a Microsoft Gold Certified Partner, we provide extensive Microsoft product support to our growing customer base.

Our unique approach to delivering projects, offering fixed price contracts, means that our customers know exactly what they are getting for their money. That's why we are the partner of choice for over 100 companies, from construction and manufacturing to retail and distribution.

For more information about our products and services, please call: **01675 432400**, email us at: **sales@metaphorix.co.uk** or visit our website: **www.metaphorix.co.uk**

Guthrie Douglas

Guthrie Douglas is a manufacturer and distributor of motors for industrial doors and shutters. They developed the world's first single roller Tensioned Shading System (Tess), which is an automated shade for operating fabric sun screens on large glazed areas, popular on commercial buildings.

Charlton and Jenrick

Specialising in the design and manufacture of quality fires and fireplaces, Charlton & Jenrick's products are carefully crafted to deliver high quality at competitive prices. The complete fireplace solution for any home, their fires and fireplaces offer exceptional performance and stunning design to complement your lifestyle.

GUHRING

Guhring manufactures and supplies high quality, advanced design cutting tools for all kinds of manufacturing businesses. With over 30,000 standard products, including drills, taps, end mills and tool holders, Guhring is recognised worldwide for excellent quality, precision manufacturing and outstanding tool performance.

HM

Harold Moore manufactures manual handling solutions for food hygiene, janitorial, equestrian, building and safety industries for their own brand and for other major suppliers. Based in Sheffield, their top quality, British-made products are in demand throughout the world.

WILO

Worldwide, the name Wilo is synonymous with the tradition of first class German engineering. Their pumps and systems for heating, air-conditioning, cooling, water supply and sewage disposal are used in commercial buildings, municipal facilities, industry as well as in private homes.

MACRON

Macron Safety designs and manufactures fire suppression products for customers around the world. Macron delivers high quality, effective fire protection solutions that protect people, places and processes. Macron Safety is part of the Tyco Fire Suppression & Building Products Group.

MILLERS OILS

Millers Oils manufactures high-quality lubricants, fuel treatments and other high performance formulations for use in automotive, commercial vehicle and industrial applications. Respected world-wide for product innovation and award winning formulations, they were the first to develop commercial engine oils capable of long drain intervals.

RIM STOCK

The Rimstock Group is a worldwide organisation supplying high-quality ultra-lightweight, cast heat-treated and forged aluminium wheels. Its manufacturing facilities operate from four purpose-built production installations, all located in the industrial West Midlands area of the UK.

whiston industries
world class tooling.

Whiston Industries is the UK's top press tool manufacturer, supplying the worldwide automotive, aerospace, medical, energy and marine industries. The company's utilisation of advanced technology has helped it grow its presence in the world's automotive tooling marketplace.
